

CORPORATE CREDENTIALS

40 YEARS+
EXCELLENCE

BEST PRACTICE

Established in 1975, NEACH are proud to have achieved sustainable and planned growth enabling us to progressively expand our team, service offerings and expertise.

NEACH provides its clients with industry leading vertically integrated services that are third party certified to the following standards:

- AS 4801 for safety
- ISO 9001 for quality
- ISO 14001 for the environment

NEACH are committed to Industry Best Practice and strives to continuously improve its services. As a service provider, our systems form the backbone of the company and have continued to support our growth over time. These robust and mature systems are what set us apart from our competitors.

NEACH's company culture is centred on continual evolution and improvement. A track record of success which spans 40 years means you are dealing with a company that offers reliability above anything else.

OUR SERVICES

For over 40 years NEACH has specialised in working with clients on projects which cover structural steel fabrication, metalwork, abrasive blasting and surface treatment.

STRUCTURAL STEEL

At NEACH, our 40 years of structural steel and steel erection experience ensures client projects are met with innovative technology, quality services, and collaborative processes. Our 2500m² workshop has a baseline capacity of 200 tonne per month. This capacity can be increased for those clients who have compressed schedules or emergency projects.

Our structural steel services include:

- Structural Steel Drafting
- Engineering Certification
- Steel Fabrication (Mild Steel, Stainless Steel and Aluminium)
- Site Erection and Installation
- Crane Hire

METALWORK

Experience is key in maintaining consistent high quality standards with metalwork projects. Skilled tradesmen are essential and the NEACH team have had decades of experience perfecting their craft. Detailed architectural designs and high quality finishes are achieved for our clients through the collaborative development of each project. NEACH offer metalwork in Mild Steel, Stainless Steel and Aluminium.

Some of our typical projects include:

- Balustrading
- Awnings
- Staircases
- External Shelters and Shade Structures

SURFACE TREATMENT

Our state-of-the-art blasting booth is capable of handling a variety of abrasive blasting and surface treatment needs. We use EPA approved steel shot, as it is extremely robust and environmentally sustainable. NEACH offer a range of standard surface finishes and coatings. Where specific coating specifications need to be met, NEACH have the capability to source products to execute these custom works.

The standard finishes NEACH offer are:

- Primer – High Build Zinc Phosphate
- Two Pack Epoxy
- Zinc Hot Metal Spray
- Passivation
- Polishing

INDUSTRY SECTORS

Our team of experienced and capable professionals have the skillset, resources and experience to cater for projects in the residential, commercial, industrial, infrastructure and energy sectors of the construction industry.

RESIDENTIAL

NEACH have been working with architects, engineers, builders and clients on high-end personal homes and multi-level high density residential projects for over 40 years. NEACH have the advantage of offering these projects a full vertical integration of services from design through to installation. Further to this, NEACH can cover both the metalwork and structural trade packages on each project helping to reduce coordination challenges by having all your steel needs met with one company.

COMMERCIAL

NEACH deliver structural steel fabrication and erection work scopes on commercial projects across the South East Queensland region. We supply structural steel and metalwork on all types of commercial projects including some of the following:

- Industrial Buildings
- Tilt Panel Factories
- School Buildings
- Shopping Centres
- Aircraft Hangers
- Medical Facilities

INDUSTRIAL

We work closely with the industrial sector, operating across Tier 1 and Tier 2 clients, supplying structural steel and metalwork for factory, mining and plant projects. NEACH work directly with site management to ensure project goals are clearly defined and expectations are met with high quality products. We are committed to Quality Assurance and Industry Best Practice, and hold third party ISO Certifications for safety, quality, and environment.

INFRASTRUCTURE

High quality steel fabrication is a critical service for government and private infrastructure projects. NEACH have proudly worked across a variety of projects in South East Queensland, delivering high quality steel solutions, fabricated and installed on site.

NEACH's operations team works closely with our clients to ensure project specifications are achieved. Full project material data records are supplied at the completion of each contract. NEACH is proud to support government projects in building Queensland's future.

ENERGY

As demand for energy and power grows, so does NEACH's capability in this space. Our experienced team works closely with clients in the power generation and renewable energy sectors, delivering innovative solutions for projects that are often complex.

NEACH has won and delivered contracts for various projects across South East Queensland, including power stations, solar farms and local government energy projects. In addition, NEACH have fabricated prototypes under strict confidentiality for clients in the Clean Energy Technology sector.

A MESSAGE FROM OUR MANAGING DIRECTOR

I would like to personally thank you for considering NEACH for your next project.

Since its founding, the culture of NEACH has always been about enjoying the journey, we love what we do. This is evident through the energy we drive into each project and is why the company survives to this day. Clients return to us time and again because of our positive 'can do' attitude, our supportive working relationships and the great results we achieve in partnership with them.

We are proud of how much NEACH has evolved over the years since opening our doors in 1975. It is our commitment to improvement, our passion to embrace new technology, and our extensive industry knowledge that provides us with the confidence to say, there is no better choice than NEACH.

Ryza Garbacz
MANAGING DIRECTOR

“ TOD Consulting has worked with NEACH for over 35 years and has always found the company has produced work of the highest standard. Ryza and Spud before him have always been approachable and have collaborated on many innovative structural and architectural designs. ”

Stefan Prystupa - Senior Engineer
(Consultant) | TOD Consulting

LEADERSHIP

Ryza Garbacz
MANAGING DIRECTOR

T +61 7 5313 8558
E ryza.garbacz@neach.com.au

Ryza has been associated with NEACH since the late 1990's and has been Managing Director from 2011. He holds a Bachelor's Degree in Civil/Structural Engineering and has 12 years of direct large scale project management experience. His experience provides clients with a leader who can quickly establish the key project deliverables and drive results across all project KPI's.
